

# QUALIFIED TRUST with primesign

One-time signing for eIDAS Identity Providers –  
we upgrade your transactions.

primesign / [www.prime-sign.com](http://www.prime-sign.com) is an Austrian TSP for qualified signatures and seals under eIDAS.

## WHY QUALIFIED?

- + No longer worry about the legal certainty of electronically signed documents
- + Qualified signatures are legally equivalent to handwritten signatures throughout the EU

## DO I NEED A NATIONAL TSP FOR EACH COUNTRY?

- + No need to search for a local TSP in every target market
- + eIDAS guarantees mutual recognition of qualified signatures and seals within EU/EEA countries
- + Keep complexity low by using primesign as an eIDAS TSP with international focus and worldwide availability

## WHY QUALIFIED SIGNING WITH PRIMESIGN?

- + „Partners first“ approach - we help our partners to integrate qualified signing in their products
- + Customer and service oriented (SLA, support etc.)
- + Integrated in various partner applications throughout the European Union and beyond

# ONE-TIME SIGNING with primesign

## FOR IDENTITY PROVIDERS

primesign one-time signing can be integrated by eIDAS conformant Identity Providers that provide identification with eIDAS level *Substantial* or *High*.

## EASY TO USE

Signing certificate is issued immediately during a signature transaction and is valid only for this specific transaction. No additional user interaction (no setting passwords, no revocation).

## QUALIFIED TRUST

primesign TRUST CENTER is compliant to eIDAS and listed on the EU Trusted List. Automatically trusted by Adobe Acrobat Reader and other applications.

## SEAMLESS INTEGRATION

UI-less integration supported. IdP displays documents to be signed and handles signing transaction. Easy to integrate in applications. No further user authorization required.

Alternatively, IdP displays primesign UI to show documents to be signed and verify authorization.

## MULTIPLE SIGNING APIS

IdP submits identity data via API and starts the signing transaction with primesign.

**Document signing:** API to sign PDF documents. Including visual representation of signature.

**Hash signing:** Use CSC-API to integrate primesign one-time signing.

## SLA, SUPPORT & AVAILABILITY

99.8% guaranteed availability. Different support plans. Premium support option available (24/7).

## 100% GDPR COMPLIANT

With Hash Signing, documents are never transmitted to primesign. Identity data is always stored securely in our infrastructure operated within certified data processing centers located in Austria. Data storage for 30 years+ for long time verification.

## LONG TERM VALIDATION SUPPORTED

Long-term verification information is embedded in the signed PDF document. Guaranteed long-term verifiability (PADES and LTV-compliant).

Timestamping and ETSI TS 103 172 V2.2.2.2 level "LT" supported.

## MORE FEATURES

- + Supports batch signing
- + Cloud Signature Consortium (CSC) API compliant
- + Built-in support for existing eIDAS eIDs
- + Accepts AML/KYC compliant user identification
- + Supports qualified timestamping
- + Easy to integrate / resell

## USE CASES

- + Online boarding for bank accounts
- + Legally close leasing and insurance contracts online
- + Online registration for mobile phone contracts

## SCALE with primesign

- + Millions of transactions per year
- + Available globally – users from 165 countries
- + Available 24/7
